

TYRE CODE EXPLANATION

SAFETY INFORMATION

CHOOSE THE RIGHT TYRE

When you choose new motorcycle tyres, make sure they are the right for your motorcycle. Double check the size and intended usage and make sure you have made the right selection.

TYRE MOUNTING

It is recommended that you permit only specially trained persons to mount your tyres. Improper mounting can damage the tire and your motorcycle, and could cause serious injury.

- Only mount front tires on the front and rear tires on the rear of your motorcycle.
- Never mount anything other than motorcycle tires on motorcycle wheels.
- Whenever possible, match front/rear tires for maximum performance and handling.
- A new tube (if required) and rim band should also be installed at this time.
- After proper tyre selection, prepare the rim for mounting and clean and lubricate the tyre bead.
- If you are mounting a directional tire, mount in the direction of the arrow.
- Seat the bead by inflating to half pressure. Rotate tyre to make sure that the tyre is seated properly.
- If not, remove the tire and re-mount. We do not recommend the use of rubber "Doughnuts" to help bead seating. If the tyre has a tube, deflate, then re-inflate the tube after the bead has seated to eliminate wrinkles and folds. Inflate to recommended pressure and re-inspect for correct seating and alignment.
- Check pressure at regular intervals and keep tyre properly inflated.
- **DO NOT** exceed recommended pressure. (found on the sidewall)

TUBE OR TUBELESS

Fitting of tyres to a motorcycle should be in accordance with what is written in the owner's manual.

BREAK-IN PERIOD

A break-in period of 100-150 miles is recommended before subjecting the tyre to maximum power and use.

TREAD WEAR

Continuously inspect your tyres for proper wear. Tyres with only 1/32" of tread left (about 0.8mm) are worn beyond safe tolerances and should be replaced as soon as possible. Keep tread clean by brushing out rocks, gravel, dirt, etc. whenever possible.

STORAGE

If you have to store your motorcycle or set of tyres for an extended period, store in a cool, dark place.

Light and heat will cause tyres to degrade more rapidly. Never allow oil or gasoline to contaminate your tyre; wipe off any spills quickly and completely.

TYRE REPAIR

Small tread area punctures can be repaired by qualified tyre repair shop or motorcycle shops.

The repairer is solely responsible for the repair and any instructions to the repaired tyre user.

Tubeless tyres with below situations can not be repaired.

- The puncture in sidewall.
- Separation of any components.(Tread, plies etc.)
- The size of puncture is larger than 1/4 inch.
- Damage of ply cord.- Damage of bead.
- Cracks.

IRC TR11 TRIALS TYRES

IRC'S TR-011 TRIAL COMPETITION TYRE is the end product of a long development period by Japan's top trial riders. This tyre features a unique dual rubber compound, ultra soft rubber on the tread with harder rubber on the side wall giving incredible gripping power needed on today's technical arena style hazards. Altogether the best tyre on the market.

VRM 140 6-PLY MOTO X TYRE

For intermediate/soft terrain. A high performance off road tyre with excellent grip, handling and stability with its aggressive tread pattern. Great for mubby conditions. Featuring a tough 6-ply construction, the VRM140 resists pinching and punctures and enables the use of low tyre pressures for improved traction.

VRM 229 6-PLY MOTO X TYRE

For intermediate/hard terrain. A lightweight 6-ply tyre featuring reinforced sidewalls to reduce flex when cornering on hard pack. The innovative design with durability in mind makes this an excellent hard terrain tyre.

VRM 308 COMPETITION TRIALS TYRE

This tyre features excellent grip due to the very soft compound block tread and extremely flexible sidewalls, with the rear tyres having radial construction. The VRM308 was extensively developed and tested by international trials riders, and is available for junior and senior bikes alike.

TYRE & TUBE ACCESSORIES

DESCRIPTION	STANIFORTH REF
TYRE GAUGES	
<i>Blister packed for easy display and sold in singles</i>	
Digital tyre pressure gauge 1-100psi	TYR016
Dial read-out pressure gauge with reset button metal case 0-60psi	PMD5010
Dial read-out pressure gauge with reset button plastic case 0-60psi	PMD5018
Low pressure pencil type gauge 1-20psi	LPG1
Tyre Tread depth gauge	TYR012
Dial Type, High Pressure, 10-110 PSI	TYR023
Stainless Steel, 5-50 PSI	TYR022
TUBELESS VALVES	
<i>Blister packed for easy display and sold in singles</i>	
Tubeless Rubber Valve for Superbikes 25mm	TUB001
10mm Straight, 42mm long for 11.5mm rim hole	
Rubber valve	TUB010
8mm Straight, chrome plated	TUB011
10mm Straight, chrome plated	TUB012
8mm Straight, chrome plated, security type	TUB013
90° angle, chrome plated valve extension	TUB014
10mm Straight, 49mm long for 11.5mm rim hole	
Rubber valve	TUB015
Right Angle tubeless valve	TUB017
8mm Tubless Valve for scooters	TUB019
REPAIR OUTFITS	
Puncture repair outfit in plastic box	PRO001
12 piece radial tyre repair kit, with 8 seal strings, 1 tube cement, 2 T-bar tools and 1 knife.	PRO006
Tubeless Tyre Repair Kit (With CO2)	PRO008
Jetflate Co2 Refill Cylinder (per 2)	PRO009
ANODISED VALVE CAPS (PER PAIR)	
Blue	VCB1
Gold	VCG1
Purple	VCP1
Red	VCR1
Silver	VCS1
RIM PROTECTOR	
Rim Protector	TYR021
Rim Protector - plastic with pull cord	TYR024
FOOT PUMP	
Versatile compact design and rugged construction, 24" Hose with thumb lock, Extra large cylinder with non slip foot pedal.	
Complete with 0-100 psi dial guage	TYR001
WHEEL CLEANING STAND	
The wheel cleaning stand allows front and rear wheels to be rotated. Ideal for cleaning, the inflation of tyres and lubricating the chain	WCS01

TYRE & TUBE ACCESSORIES
